SQL and Data Science

What it can do with data science

L   Store Large datasets

2- Query and anlyze data for better understanding

3- can perform operations on data like grouping

   aggregation.

4- Connect it with python and is librarys (Pandas, Numpy)

How to use

   install SQL server

   Create tables

   excuete querys and anlyze data

   Connect SQL with Python
